"I just talked to my dad today, one week after our flight, and he thanked me again for getting him on the flight. He is still just totally overwhelmed with how wonderful the entire trip was. I highly recommend it for all vets and being a guardian is wonderful also. I think that in a way we also did a service to others by being on this flight. People were so thrilled to see our vets and to thank them and to shake their hands. My dad said the patriotism he saw that day reminded him of how it was during WWII when our entire country was involved and working together. This was an experience that I know I will never forget and neither will my dad! Thank you Honor flight organizers - you are the best!"
